The Project

The FALM Housekeeping is a collection of tools to cleanup Umbraco. The new version of our tool works in a custom section and it has been completely re-written to take all advantages of AngularJS

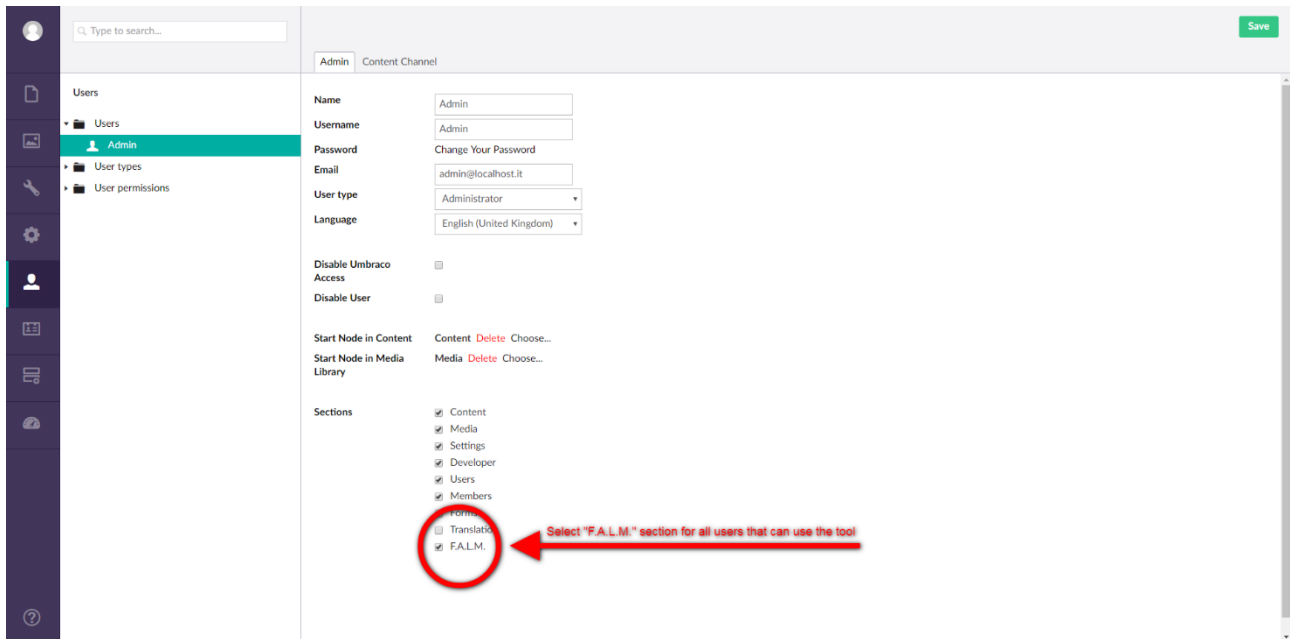

In our section, you can find the following tools:

- **Umbraco Logs Manager**
 - You can view and delete the Umbraco Logs events (DB)
 - You can view the Trace Log (this new function is a simplified version of [Diplo Trace Log Viewer project](#))
- **Media Folder Manager**
 - You can cleanup the “/media” folder (filesystem) from orphans (in other words, all that folders which have no entry in the Umbraco DB)
- **Delete Users Manager**
 - You can remove all Umbraco users (except the admin user)
- **Version Manager**
 - You can view and cleanup the versions history that Umbraco maintains for each content node
- **Recycle Bins Manager**
 - You can cleanup Content and Media Recycle Bins and create a service page to auto clean both Recycle Bins. This page can be used with a scheduler (for example I use “Url Task Scheduler For V7”) to be able to schedule automatic cleaning of Recycle Bins

ATTENTION! To view the new FALM section you must enable it for all users that can use this tool

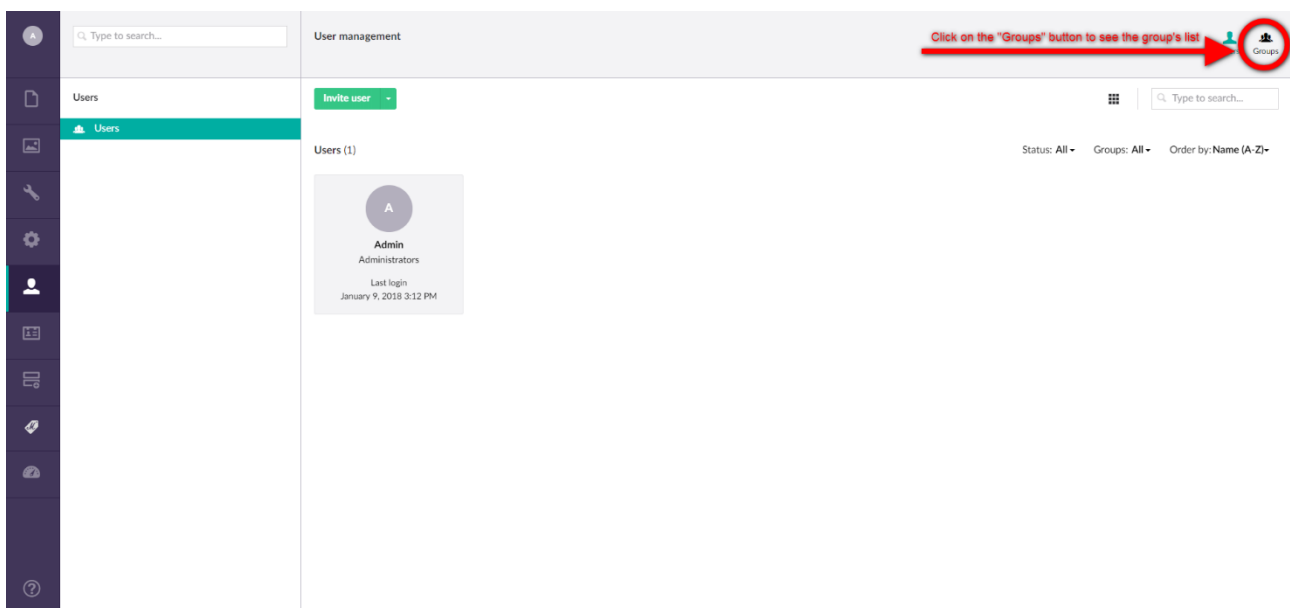

For Umbraco until v7.6.12

Users – User – Add “F.A.L.M.” section

For Umbraco v7.7+

Users Section – List of Users

Users Section – List of Groups

The screenshot shows the 'User management' interface. On the left, a sidebar contains icons for various functions, with 'Users' highlighted. The main area is titled 'User management' and includes a 'Create group' button. Below this, a list of groups is displayed under the heading 'Groups (4)'. The 'Administrators' group is circled in red. A red arrow points to this group with the text 'Select the group to enable the "F.A.L.M." section to be displayed'.

Group	Sections	Content start node	Media start node
Administrators	Content, Media, Settings, Developer, Users, Members, Forms, Merello, FALM	Content root	Media root
Editors	Content, Media, Forms	Content root	Media root
Translators	Translation	Content root	Media root
Writers	Content	Content root	Media root

Users Section – Group page

The screenshot shows the 'Administrators' group page. The 'Assign access' section is visible, listing various sections with 'Remove' buttons. The 'FALM' section is highlighted. A red circle is drawn around the 'Add' button, and a red arrow points to it with the text 'Click on the "Add" button to add the "F.A.L.M." section'.

Section	Remove
Content	Remove
Media	Remove
Settings	Remove
Developer	Remove
Users	Remove
Members	Remove
Forms	Remove
Merello	Remove
FALM	Remove

Users Section – Group – Add “F.A.L.M.” section

The screenshot shows the Umbraco Users section interface. On the left is a sidebar with navigation icons. The main area is titled 'Administrators' and has a search bar. Below the search bar is a list of sections: Content, Media, Settings, Developer, Users, Members, Forms, Merello, and FALM. The 'FALM' section is highlighted with a red circle. To the right of the sections list is a 'Select sections' panel with a list of sections: Content, Media, Settings, Developer, Users, Members, Forms, Merello, and FALM. The 'FALM' section is checked in this panel. A red arrow points from the 'FALM' section in the 'Select sections' panel to the 'FALM' section in the main list. A red text box on the right says 'Select "F.A.L.M." section for all users groups that can use the tool'.

The Package

The New Section with Dashboard

The screenshot shows the Umbraco FALM section interface. The main area is titled 'FALM' and has a 'Dashboard' tab. The dashboard contains a 'Housekeeping' section with a list of tasks: Umbraco Logs Manager, Media Folder Manager, Delete Users Manager, and Versions Manager. Below this is a 'Latest Changes' section with a list of updates from v7.7.0.0 to v7.6.0.0. At the bottom is a 'Version History' section with a list of versions from v7.7.0.0 to v1.1.0.0.

The Package - Latest Changes

- **v7.7.2.1** - Various Fixes
 - Fix: Resolved issue #48 (GitHub) in Versions manager UI
 - Fix: DBLogs manager UI
- **v7.7.2.0** - New feature and Various Fixes
 - New feature: Cache and TEMP directories Manager
 - Clean "App_Data/cache" and "App_Data/TEMP" directories on File System
 - Possibility to create a Service Page to auto clean "App_Data/cache" directory on File System. This page can be used with a scheduler (for example I use "Url Task Scheduler For V7" <https://our.umbraco.org/projects/backoffice-extensions/url-task-scheduler-for-v7/>) to be able to schedule automatic cleaning of both recycle bins. This action will create 2 FALM DocumentTypes, 1 FALM Template and 2 FALM nodes, simply by clicking a button.
After creation of the Service Page, I recommend to add all FALM nodes and template urls in the robots.txt file to avoid being indexed by search engines
 - Fix: Recycle Bins Cleanup Service Page
- **v7.7.1.0** - New feature and Various Fixes
 - New feature: Recycle Bin Manager
 - Clean Content and Media Recycle Bins
 - Possibility to create a Service Page to auto clean both recycle bins. This page can be used with a scheduler (for example I use "Url Task Scheduler For V7" <https://our.umbraco.org/projects/backoffice-extensions/url-task-scheduler-for-v7/>) to be able to schedule automatic cleaning of both recycle bins. This action will create 2 FALM DocumentTypes, 1 FALM Template and 2 FALM nodes, simply by clicking a button.
After creation of the Service Page, I recommend to add all FALM nodes and template urls in the robots.txt file to avoid being indexed by search engines
 - Fix: Resolved issue #45 (GitHub) with bootstrap-datapicker. Removed reference and files from package because the stile affected Umbraco core datepicker
 - Fix: Updated UI
 - Fix: Updated User Manager
- **v7.7.0.2** – Fix: Versions Manager now works with SQLCE
- **v7.7.0.1** – Bug: Resolved issue #43 (GitHub) in Versions Manager

- **v7.7.0.0** - Various Fixes
 - Bug: Resolved issue #40 (GitHub) in Users manager
 - Fix: Updated Versions manager UI
 - Fix: Updated TraceLogs manager UI
 - Bug: Resolved issue #41 (GitHub) in Media manager (Thank you to TFAstudio for the support)
 - Fix: Updated Media manager UI
- **v7.6.0.9** - Minor Fixes
- **v7.6.0.8** - Fix: highlighting selected node + Update transaltions
- **v7.6.0.7** - Fix: removed control and installation of FALM key in core language files. Thanks to Bjarne Fyrstenborg for the support
- **v7.6.0.6** - Some UI Fixes. Many thanks to Bjarne Fyrstenborg for the support
- **v7.6.0.3** - Updated naming to prevent conflicts
- **v7.6.0.2** - Updated NuGet Package
- **v7.6.0.1** - Minor fixes
- **v7.6.0.0** - New version: totally rewrite using AngularJS and now in a Custom Section. Fixed SQLCE compatibility (Not yet for Versions manager)
- **v7.0.0.1** - Bug Fix: Resolved Error 404 when click all main headers (Logs, Media, Users, Versions) and resolved conflict in Users Manager

The Package - Versions History

- **v7.7.2.1** - For Umbraco v7.7+
- **v7.7.2.1_for_Umbraco_v7_6_13** - For Umbraco v7.6.0 to v7.6.13
- **v7.6.0.3** - For Umbraco until v7.5.14
- **v7.0.0.1** - For Umbraco v7+
- **v6.1.3.0** - For Umbraco v6 to v7.2
- **v4.11.0.2** - For Umbraco v4.8 to v4.11
- **v4.5.0.1** - For Umbraco v4.5 to v4.7.2
- **v1.1.0.0** - For Umbraco v3 to v4.0
